

Hospital Community Benefit Spending: How to Increase Investments in Population Health

Tuesday, January 10, 2017 12:30pm-2:00pm Eastern

Supported by the Robert Wood Johnson Foundation

Webinar Agenda

12:30 pm	Welcome and Introductions Trish Riley, Executive Director, NASHP								
12:40 pm	Overview of Community Benefits Spending Maureen Byrnes, MPA, Lead Research Scientist, Department of Health Policy and Management, Milken Institute School of Public Health, George Washington University								
1:00 pm	Overview of Study Sara Rosenbaum, J.D., Harold and Jane Hirsh Professor, Department of Health Policy and Management, Milken Institute School of Public Health, George Washington University								
1:20 pm	Opportunities for States Cynthia Woodcock, MBA, Executive Director, The Hilltop Institute								
1:40 pm	Questions and Discussion								

Supported by Kresge Foundation and Robert Wood Johnson Foundation

January 10, 2017

Role of Hospitals in Improving Community Health

Drivers of change:

- A growing focus on social determinants of health.
- Health care reform.
- Expanding and refining the community obligations of taxexempt hospitals.

Rosenbaum, S. 2016. Hospitals as community hubs: Integrating community benefit spending, community health needs assessment, and community health improvement. Retrieved at https://www.brookings.edu/research/hospitals-as-community-hubs-integrating-community-benefit-spending-community-health-needs-assessment-and-community-health-improvement/

Community Benefit

- **1956**: IRS rules that hospitals can meet the community benefit test if they furnish charity care.
- **1969**: IRS broadens community benefit definition to encompass hospital activities that benefit communities as a whole.
- 2009: IRS introduces the Form 990 Schedule H Worksheet

SCHEDULE H (Form 990)		Hospitals			-		OMB No. 1545-0047

Milken Institute School of Public Health

THE GEORGE WASHINGTON UNIVERSITY WASHINGTON, DC

The Numbers

- > 50% of all U.S. hospitals (> 2900) operate as nonprofit corporations.
- Between 2002 and 2011, national value of tax exemption estimated to nearly double, from \$12.6 billion to 24.6 billion (federal and state income taxes, state and local property and sales taxes)
- IRS reported > \$62 billion in community benefit spending in 2011

ACA Reforms to Tax-Exempt Policy

- EMTALA compliance
- Financial assistance policy
- Limits on charges
- Bar against unreasonable collection efforts
- Community Health Needs Assessment (CHNA)
 requirements including transparent, public-involved
 planning, transparency, and implementation strategy
- No change to pre-existing community benefit definition

What's Missing?

Three key factors inform the conversation and collaboration:

- A clear link between health planning and community benefit investment
- Transparency in community benefit investment choices
- Incentives to spend on community-wide health improvement

Community Benefit Web Resource

- Prototype developed by GW for Robert Wood Johnson Foundation.
- Full web resource scheduled to be available in 2017.

Charity Care and Certain Other Community Benefits at Cost for Tax Year 2011: Number and Selected Financial Data by Type of Community Benefit*

Note: Money amounts are in thousands of dollars. Detail may not add to totals due to rounding

Milken Institute School of Public Health

THE GEORGE WASHINGTON UNIVERSITY WASHINGTON, DC

New Research

CHNAs emphasis on importance of upstream spending on social risk factors:

- 72 percent of hospitals identified obesity;
- 68 percent identified mental health; and
- 62 percent identified diabetes

... as the top health challenges of their communities.

Current IRS Policy

- IRS separates community building (community-wide efforts) from community benefit spending while requiring separate justification for community-wide health improvement efforts
- IRS does not require hospitals to report CHNA-linked CB spending or describe how CB spending responds to CHNA priorities

IRS Policy Opportunities

- Broaden the definition of community benefit to clearly include community health improvement activities that encompass community-wide efforts, now classified as separate community building activities
- Revise Schedule H reporting to include hospital reporting on the Relationship between CHNAs, implementation strategies, and CB spending
- Advance best practices in community-wide health improvement through government-wide advisory committee that identifies evidence-based upstream spending initiatives that hold promise to improve community health

Suggested Reforms

- 1. Eliminate regulatory obstacles to "upstream" spending
- Clearer link between CHNAs and community benefit spending
- 3. Transparency

Hospital Community Benefit Policy: Opportunities for States

January 10, 2017

Cynthia Woodcock

National Academy for State Health Policy

Presentation Overview

- Promoting community involvement in the Community Health Needs Assessment (CHNA) process
- Using regulatory tools to incentivize a focus on social and economic determinants of health
- Encouraging hospital transparency and accountability
- Repeal and Replace: Implications for states

Regional and community partnerships can increase the effectiveness of the CHNA process

- Multi-facility collaborations and collaborations between hospitals and public health agencies are not only permitted but *encouraged* by the 2014 IRS final rules
- Collaborations help align hospital community benefits with public health planning and avoid duplication of effort
- Potential partners: hospitals, physician groups, state and local public health and social services agencies, community stakeholders, health plans, private funders

States can encourage or require community involvement in the CHNA process

- Massachusetts: Attorney General's guidelines encourage hospitals to seek input from community groups representative of the populations served
- Maryland: Requires hospitals to consider CHNAs developed by state/local health departments and encourages consultation with community groups
- **Texas**: Requires hospitals to consider input from local health departments, public health districts, and community stakeholders
- Utah: Mandates annual consultation with county health officials by hospitals and nursing homes as part of the CHNA process

Some successful regional and community collaborations

- Integrating Community Health Improvement and Population Health: Children's National Health System, Washington, DC
- Mayor's Healthy City Initiative: Baton Rouge, LA
- From Volume to Value: Carroll Hospital, MD
- Soccer for Success: Trinity Health

Some successful regional and community collaborations continued

- Enos Park Access to Care Collaborative: Springfield, IL
- Communities that Care Coalition: Franklin County, MA
- Allies for Substance Abuse Prevention of Anderson County: Anderson County, TN

Some states use regulatory tools to encourage investment in social and economic determinants of health

- New York: Implementation strategies must focus on at least two of five state Prevention Agenda priorities
- California: Statute gives examples of community benefit activities that address social and economic factors that shape health
- Maryland: Statute requires hospital implementation strategies to describe efforts to track and reduce health disparities

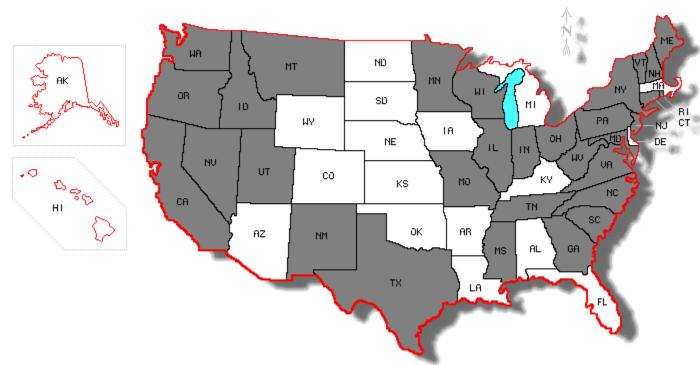

State reporting forms can include a focus on social and economic determinants of health

New Hampshire: The state's community benefit reporting form requires hospitals to indicate socioeconomic "needs" being addressed, such as poverty, unemployment, educational attainment, high school completion, vandalism/crime, homelessness, air quality, and water quality

State reporting requirements can encourage transparency and accountability

31 states require hospitals to report on community benefits

Examples of state reporting requirements that encourage transparency and accountability

- California hospitals must complete a narrative section on community benefit activities
- Vermont requires community benefit reports to be posted on both the hospital's website and the state's website
- New York and Washington require hospitals to post implementation strategies on their websites
- Indiana and Maryland hospitals must report on the effectiveness of community benefit initiatives
- New Hampshire and Rhode Island require hospitals to report activities that they anticipate undertaking in the near future
- Maryland, Indiana, and Texas can impose civil penalties on hospitals for overdue community benefit reports

How can states be more proactive in promoting targeted and collaborative hospital community benefits?

- Now that the CHNA process mandated by the Affordable Care Act (ACA) is established, states should focus on:
 - More regional, multi-stakeholder collaboration
 - Greater transparency
 - Implementation processes and challenges
 - Evaluation to assess whether desired outcomes are being achieved
 - More comprehensive reporting by hospitals that goes beyond Schedule H and can be used to monitor progress with state health reform initiatives

Repeal and Replace: Where does this leave states?

- Repeal of §9007 of the ACA would:
 - Eliminate the requirement for hospitals to conduct CHNAs every 3 years (as well as to adopt CHNA implementation strategies and conduct evaluations)
 - Do away with reforms related to financial assistance policies, limitations on charges to patients who are eligible for financial assistance, and billing and collections practices
- States need to act now to develop their own legislative and regulatory "replace" strategies in the event Congress does not see this as a priority

About The Hilltop Institute

The Hilltop Institute at the University of Maryland, Baltimore County (UMBC) is a nationally recognized research center dedicated to improving the health and wellbeing of vulnerable populations. Hilltop conducts research, analysis, and evaluations on behalf of government agencies, foundations, and nonprofit organizations at the national, state, and local levels.
